SCALE FOR PROJECT PISCINE PHP (/PROJECTS/PISCINE-PHP) / DAY 00 (/PROJECTS/42-PISCINE-C-FORMATION- PISCINE-PHP-DAY-00)

You should evaluate 1 student in this team

Git repository

git@vogsphere-v2.hive.fi:vogsphere/intra-uuid-1d9e7e28-4602

Guidelines

You already know how peer2peer evaluation work by now and during this PHP Piscine, it works as any other Piscine projects you have evaluated so far. Take the time to discuss the assignments and to make sure that the evaluated has understood the notions of the day.

Preliminaries

The basics

- The whole team must be present.
 - Only grade the work that is in the student or group's GiT repository.
 - You must use Chrome for this defense.
 - If there is nothing in the repository, the evaluation stops here.
- Discuss what went wrong and how to avoid facing the same situation tomorrow.

☒ Yes☐ No

Ex00 - Basics or home

Are all the required elements here?

You will check that :

- The background color is pink (#FFC0CB or in decimal).
- The navigation tab title contains "Basics".
- There is a white title centered on the page. It must have a bigger font size than the rest of the elements and contain at least one accent.
- There are two images side by side that represent e-shops.
- There is a link under each image. When you click them, they must redirect to the corresponding e-shop.
- There is a horizontal line under the links.
- There is a line containing the copyright symbol, followed by the evaluated login and the current year, all in monospace font. The line must be aligned on the right side of the page.

If one of these elements is missing, answer "No" and the evaluation of this day stops here. A maximum of one mistake will be tolerated out of the total amount of points evaluated.

☒ Yes☐ No

Ex01 - Mendeleev

Is the table corresponding to what's expected?

You will check that :

- The table is properly displayed. It must contain at least 7 rows and 18 columns and 2 more rows if the lanthanides are displayed too.
- The table is in pure HTML/CSS (it is not an image of the periodic table). Modify one of its elements in the source code and check that it changes in the browser as well.
- There are some colours and at least one image.
- Each cell of the table contains :
 - The symbol in a bigger font size and in bold.
 - The atomic number in the bottom left hand corner, in a smaller font size.
 - The atomic weight in the bottom right hand corner, in a smaller font size.

If all the points are checked and as long as the layout and the content of the cells are respected, even if the table is not pretty, tick "Yes". If one of the elements is missing, tick "No" and the evaluation stops here for today.

☒ Yes

☐ No

Ex02 - Day of the 42

How good is your game interface?

You will check that :

- All of the provided images have been used (no more, no less).
- The 10 required "alt" and "title" are present (the two top icons, the five images on the left and the three images on the right). If there are more, it's OK.
- The two dynamic areas are clickable and redirect to the right websites (the middle chair - second one from the right and the first screen of the first row - first one from the right).
- The two other links are included and they redirect to the proper websites.
- The background colors are identical or very similar to the ones in the original image.
- The magnifying glass is overflowing a little bit.
- The green area is covering the central image.
- Inside the green area, the font sizes and families are respected (serif and sans-serif) and the last word is on a new line.

- There is a red text shadow under the last word of the green area.

We will tolerate a maximum of 3 mistakes out of the total amount of points evaluated. Above that, tick "No" and the evaluation stops here.

✓ Yes

✗ No

Ex03 - The shrunk agent

Control of the responsivity... ness?

Display the page.

Decrease the size of the window : the table and the text must shrink and get smaller as well.

Enlarge the size of the window: the table and the text must expand and get bigger as well.

If it's smooth, it's worth a bonus point (see the following question). If it's a little "rusty" (e.g. some text is overflowing in the next cell, or there are only two different font sizes), it's still okay.

If the size of the cell or the font size doesn't change at all, tick "No" and the evaluation stops here.

✓ Yes

✗ No

Bonus

Is it smooth?

✓ Yes

✗ No

Ex04 - SNCF Sandwich

Do we have a menu?

You will check that :

- There are at least 5 dropdown menus on the page, contained in a < nav > item.
- Three of the dropdown menus contain at least 4 clickable items each (it doesn't matter where the links redirect to).
- There is at least one dropdown menu that contains at least 4 clickable links and another dropdown menu (which also contains at least 4 clickable links).
- There is at least one dropdown menu that contains:
 - At least 4 clickable items

- A dropdown menu that contains at least 4 clickable items and another dropdown menu also containing at least 4 clickable items.

- The evaluated only used HTML and CSS.

☒ Yes☐ No

Ex05 - SCUMM

A playable game?

To consider this game as playable, it must have some kind of a scenario, with different locations, objects to take, interactions with the environment and NPCs.

The game must have a starting point and an objective that we can follow.

You will check that the game is relatively playable and that it has a scenario (we will not judge the quality or the eccentricity of the story but the fact that it's that some actions are only available at specific times, for example).

If at least 5 features mentioned in the subject are present and are well implemented, tick "Yes".

☒ Yes☐ No

Bonus

Wow, the game is so amazing, it has a great gameplay, cool images, a lot of funny objects and interactions with the characters!

☒ Yes☐ No

Ratings

Don't forget to check the flag corresponding to the defense

☒ Ok☐ Empty work☐ Cheat☐ Crash☐ Forbidden function
